Bittorrent P2P downloads (older releases)

Bittorrent is a very efficient and secure way of downloading large files. To download CAELinux, just use the following torrents file v client. At CAELinux, we use Transmission Bittorrent client for seeding our images.

Torrent files:

<http://www.caelinux.com/bittorrent/torrents/CAELinux2011.iso.torrent>

<http://www.caelinux.com/bittorrent/torrents/caelinux2010.iso.torrent>

<http://www.caelinux.com/bittorrent/torrents/CAELinux2008.iso.torrent>

Tracker / stats:

<http://www.caelinux.com/bittorrent/tracker/mystats.php>

Please note that the Tracker stats are not very reliable, so even if no seed is reported, the torrents may be seeded properly
